DONALD
B A T H F I T T I N G S

Quality of life EVERY DAY

Fittings accompany us throughout our daily routines. We come into contact with them all the time in the bathroom and kitchen. This gives rise to certain wishes & expectations for form and function. Donald understands these requirements, and implements them in products that are perfectly finished & that combine timeless design, innovation technology and superior quality conductors- they represent an excellent quality of water.

We also set store by this closeness to people in our company. In numerous cities, Donald employees take personal care of requests from our customers & partners. they know; they can rely on Donald and can expect a lot more in future.

As a manufacturer of fittings, we are conscious of our responsibility to be more economical in our use of water. Environment friendly production methods and smart use of resources are therefore a longterm obligation for us. With DONALD water saving, we implement this promise with products that save water- for the future of our planet.

Water is the most valuable and Scarce resource on planet Earth. We, at Donald have used the latest technology in our products to do our best for saving the precious and scarce resource water.

We use **NEOPERL** (MADE IN GERMANY) Aerators

An Aerator Is A Key Component Of Every Faucet, Which Is Integrated Into The Spout At The Front And Forms The Water Jet. Usage Of Water Saving Aerators Makes It Possible To Achieve Water Saving Up To 75% Without Compromising On Pressure.

SAVE UP TO **75%** OF TAP WATER

Below are the details of various water saving aerators we have for our customers

ADDED ADVANTAGES

- Made By Neoperl Germany , leaders in water saving components.
- Maximum lime resistance.
- Maximum lifespan.
- Perfect stream quality even under different flow conditions.
- Very low noise level.
- Damage proof: unlike Conventional wire mesh screens, it can't be crushed.
- Integrated anti clogging dome screen which filters sediments and particles.
- Constant flow rate as per requirements can be achieved irrespective of input pressure.

***** Water Saving Aerators Are Available On Customer Request.**

AERATOR
MADE IN GERMANY

FLOW REGULATORS

Flow regulators maintain a defined, virtually constant flow rate regulators to fluctuations. You can use use flow regulators to reduce water consumption and take advantage of cost-effective solutions in the wide spectrum of technical applications.

DONALD flow regulators are used in faucets, in instantaneous water heater and in solenoid valves. They comprise a precision control o-ring, a core and a housing (certain model only.) The gap between the opening through which the water flows. The opening may be inside or outside the o-ring depending on the model.

THE DONALD DIMENSIONS

THE PHILOSOPHY

Donald is an ever evolving brand that survives to retain its premium position in the industry through constant innovation, pro-active marketing and prompt after sales service. Setting standards and surpassing them is something that comes habitually. Donald has been expanding markets nationally and internationally, penetrating deeper into existing markets. Donald has been further delighting customers and winning their confidence, creating a brand equity which is the envy of the entire industry. Download, the pursuit of excellence is never-ending.

THE TECHNOLOGY

Donald uses technology as the main tool to enhance the appeal of its products and fuel its growth. It has installed the world's most advanced plant and machinery sourced from top global manufacturers, Besides, it keeps abreast of the latest technical developments, incorporating them judiciously into its production processes.

Donald is one of the largest exporter of bathroom fitting products from India

The Company has manufacturing unit, 1 R&D centre, and 1 stockyard that uses cutting edge inventory management practices. The total area of the manufacturing unit is 6000 square meters.

Donald carries out its entire production process-in-house, including fabrication of components, attending to the minutest details and ensuring the highest Quality at every stage of production.

The Company has adopted the silica core technology which guarantees defect-free, even finish and uniform wall thickness on the inside section of the products. The Entire machining is carried out on fully automatic and semi-automatic high-precision machines.

All the vital internal parts are fabricated on fully automatic traub machines to ensure total standardisation in Quality & Specifications. Auto-polishing machines and highly-advanced chemical coating plant ensure excellent finish. The entire production undergoes pneumatic testing on live pressure of up to 150psi and for concealed items up to 300psi.

The company's testing laboratory is equipped with coulometric budget system for checking the thickness of nickel and chrome finish and electrolytic analysers to ensure the right composition of brass.

Donald products are designed & manufactured to attain longevity reliability and offer highest standards of styling. Each product conforms to international standards and undergoes numerous stringent quality control tests.

HIGH ON EFFICIENCY

Two silicon 'O' rings are provided on the valve of the internal cartridge to ensure water does not reach the internal cartridge from the lower chamber. Since water does not reach the acme threads, they always remain lubricated resulting in less wear & tear and longer life. If after regular use one silicon ring gets cut, other silicon ring supports the fitting and thus there is no leakage for year to come.

Bore of the seat and the water passage area throughout the body section have a uniform diameter of 12.7mm (proper 1/2" size of fittings) resulting in better flow of water even on normal water pressure.

There is no metal to metal contact. Moreover, a special 'O' ring is used in all metal parts to ensure smooth operations for years to come.

QUARTER TURN FITTINGS

The internal cartridge of the quarter turn mixers are fitted with specially designed ceramic disc having a diameter of 3/4" (20mm) to ensure full flow of water even on normal pressure.

All the metal parts of the internal cartridge including the bonnet, are made of extruded brass rod ensuring flawless performance for a longer period.

SINGLE LEVER MIXERS

Specially designed ceramic disc cartridge ensures 15-20% increase in water flow even at low pressure.

ALL SINGLE LEVER CARTRIDGE ARE WRAS (UK), KTW (GERMANY) & ACS (FRANCE) CERTIFIED.

All basin mixers comes with high quality flexible leg set which work well in high pressure areas & do not leak for years to come. Internal working parts do not come in contact with water at all ensuring fault-free working.

PRODUCT UPGRADATION THROUGH R & D

Donald extensive R & D facilities ensure constant upgradation of its products. Continous development & trail of new product as well as modification and improvement of existing products are at the heart of donald innovative approach. Use of high quality brass, use of brass pipes only, high quality imported parts from Germany & Spain results in high quality taps for your house.

The CD / CM equipped design studio of Donald uses the latest software to carry out basic designing functions and define technical specification of new products. Over the year, the creative team at donald has explore new dimensions in designing & introduction unconventional, path breaking designs which are the envy of the industry. Based on regular consumer feedback, donald keeps modifying its products both in terms of function and design.

AFTER-SALE SUPPORT

All Donald products are designed to work flawlessly for years. The most reliable & prompt Donald after-sale service is just a phone call away for trouble-free performance for years an end. Infact, when you buy a life long relationship. Our can always depend on us and count on our all-support.

Display boards, promotional gift items, advertisement in print & electronic media results in maximum reach of Donald products.

Winning
CUSTOMERS TRUST
SINCE 1994

MADE ON AUTOMATIC MACHINES

WHY DONALD ?

Donald Faucets provide a great experience with there high quality performance .

Use of high quality brass with copper content of more than 59% ensures ZERO Breakage in the faucets. Our state of art manufacturing units are backed by the best machines - all from casting till assembly. The technologically updated machines are imported from Europe , Asia and also sourced from India. Having a world class lab ensures that all raw materials are tested on modern testing machines which results in a super quality final product.

Donald Care

DONALD Guarantees

- Water saving up to 60%
- European Quality
- 5 Years Warranty
- European spare parts
- Environmentally friendly production
- Efficiency in distribution and in project business
- After sale services
- Awareness of local needs and influences
- Direct dialog with DONALD team
- Global Company with presence in 60+ countries worldwide

FAUCET

DONALD faucets provide a great experience with their high quality performance. DONALD's in-house, award winning design team is well integrated in its approach and always working to provide excellent designs and quality for its customers. Our state-of-the-art manufacturing units are backed by a world-class testing lab. That's why Donald faucets conform to the highest quality and regulatory standards. The faucets range comprise of 32 ranges to suit various design needs, besides a complete range of faucets with single-lever, quarter turn and multi-turn operation.

FEATURES

Cartridges

The heart of every faucet, the cartridge is responsible for controlling water supply.

- Donald cartridges are 200000 cycle tested to give a longer and trouble free operating life of up to 10 years (considering 60-70 operations per day)
- Wide angle of lever provides ultra comfort and flawless, smooth operation
- Our cartridge are WRAS (UK) , KTW (GERMANY) & ACS (FRANCE) certified .
- The body of cartridge is made of Food Grade plastic . Thus the water that comes out of Taps is absolutely safe for drinking & cooking .
- Works smoothly even at high temperatures (85 degrees) and in various pressure conditions (0.5-5 bar)

Chrome Finish

- Upper shiny protection layer provides a mirror finish to every faucet.
- High plating thickness (Nickel: 8-10 microns and Chrome: 0.2-0.3 microns) provides tolerance to extreme climate and water conditions
- 300+ hours of salt spray test ensures our finishes are highly durable and corrosion resistant for a much longer duration.

Aerators

- Devices that mix air with water to give a soft and splash-free flow.
- Made in Germany Aerators are used for high quality and smooth water flow .
- Our integrated honeycomb-structured aerator, provides lime build-up protection
- Integrated anti-clogging dome screen of the aerator filters sediments and dust particles

Export

With sales network and a leader in 60+ countries all over Europe , Middle East & Africa , Donald is Global company in the making . We have strong distributor network in all countries and selling to almost 35000 shops all over the Globe .

DONALD range of products are so precision engineered and made to such exacting quality standards, they come with a 5 Year Warranty. So that customers could rejuvenate without a worry.

MISSION

To emerge as the most admired innovation business leader and achieve excellence in the real estate sector by maintaining the highest standard of technology, customer satisfaction and spirit of partnership.

VISION

Specialised leadership, Focus on commitment and consistent on time-delivery define the trifecta of our vision. We aspire to give our clients a lifestyle at par with international standards keeping affordability and sustainable development in mind. To provide an integrated network of interlinked services with constant progress and commitment to deliver exceptional value for our customers and community.
